32	9.6	34	10.5	36	10.5	38	9.7	40	10.7

Figure 1 consists of two target diagrams side-by-side. The left target shows a cluster of red circles (shots) centered around the bullseye. The score for this cluster is 41.50, and the total score for the target is 102.6. The right target shows the same cluster of red circles shifted to the right, away from the bullseye. The score for this cluster is 51.60, and the total score for the target is 103.4. Both targets have concentric circles representing score zones, and a dashed circle indicates the original dispersion area.
